## **Preface: The 2<sup>nd</sup> International Conference on Science, Mathematics, Environment, and Education**

This year we present the conference theme ‘**Innovative Research in Science, Mathematics, Environment and Education for Sustainable Life**’. This theme is closely related to the 21st century and the fourth industrial revolution issues. This conference aims to provide a forum to share and discuss ideas and new development in science, math, environment and education, as well as novel ideas in a holistic manner to address the challenge and issues on global sustainability. According to the theme, this conference encompasses a wide spectrum of topics including the state-of-art and recent trend in different innovative research in science, mathematics, environment and education which will be covered through plenary lectures, oral and poster presentations.

This second International Conference on Science, Mathematics, Environment and Education (ICoSMEE) aims at bringing together researchers, educators, scientists, and scholar students in the area of Science, Mathematics, Environment and Education to exchange and share their experiences, ideas, and findings and to discuss practical challenges encountered and the solutions to develop humanity and the quality of human life in a sustainable manner. The conference was held in Surakarta, Indonesia on July 26-28, 2019. Hundred of mathematics and science education experts and practitioners joined the event. There were six keynote speakers who came from Indonesia, Malaysia, Taiwan, Japan, Brunei Darussalam and Saudi Arabia. There are 250 articles were presented in the conference and 145 articles are selected to be publishing in the present conference proceeding.
